

Camp Hawkeye

CiT Goals Sheet

During the interview process each CiT member is asked about goals, both personal and professional, for the camp season. Each individual is also asked about things that they would like their campers to learn from them. Please take some time now to extend this process and make it more real. Think about your role this summer; consider your responsibilities at camp and the environment of which you will be a part, and come up with at least three goals for yourself. These goals should be things that are attainable during your nine weeks at camp yet serious and require some effort on your part. As an organization Camp Hawkeye is committed to the growth and success of all community members, campers and CiT included. This means that not only shall counselors, administrators, and non-counseling CiT be working to ensure that campers have a once in a lifetime transformative experience, but, that as a CiT team each of us will be working to create an environment conducive to the achievement of our individual and collective goals.
